Project Title: Alpha creative – Fashion Designer Website

Course: Bachelor of Computer Applications

INTRODUCTION

The convergence of fashion designing and web development has led to innovative solutions for the fashion industry. This project, **ALPHA CREATIVE**, is a mini project developed using HTML and CSS to design a responsive and visually attractive website for Fashion Designer. This report delves into the integration of these two domains, highlighting the importance of web development in fashion, the software and hardware requirements for such projects, the modular components involved, and concludes with a summary of key insights. The website aims to provide a rich user experience, contact information and ultimately aiming to attract clients.

MAIN OBJECTIVES

The main objective of the Alpha Creative website project are:

1. **Creativity**
2. **Unique and Professional image**
3. **Maintaining strong relationships**
4. **Top quality**
5. **Affordable cost**

TECHNOLOGIES USED

1. **HTML5:** For structuring the web pages
2. **CSS3:** For styling and layout design

3. **Fonts & Colours:** Custom fonts like Poppins and Lobster, along with colour schemes such as #e63946 (Red), #fff8f0 (Light Peach), and #333 (Dark grey).

FEATURES OF THE WEBSITE

Design Features

1. **High-Quality Images:** A showcase of high-quality images of the designer's work, including photos of garments, sketches, and fabrics.

2. **Visual Storytelling:** The use of images and videos to tell the story behind the designer's brand and designs.
3. **Typography and Fonts:** The use of creative typography and fonts to reflect the designer's brand and aesthetic.
4. **Colour Scheme:** A consistent colour scheme that reflects the designer's brand and aesthetic.

WEBSITE STRUCTURE

1. **index.html** – Main file containing the content of all sections

2. **style.css** – External CSS file is used for all styling and layout
3. **images/** - Folder containing images including runway show footage, product photography and lifestyle imagery.

PAGE OVERVIEW

1. **Homepage**

[visual impact, brand story, clear navigation]

2. **About us**

[credibility, brand identity]

3. **Product pages**

[detailed information, high- quality visuals
easy shopping]

4. Contact page

[multiple contact options, customizable
form]

CONCLUSION

The conclusion for this mini project is to learn about web development and we did learn that from making a static website by using HTML and CSS language.

However as per of our major project, our main website is dynamic and in future will be commercial which we also made in these will

be going to merge with our major project and in that project Web Development, Software Development and many other things we must do and for that project this project was necessary.

In the end, we will thanks to our respected Mr. Jagvinder Sir who gave us the wonderful opportunity to make this project.
